The Division of Underground Storage Tanks (Division) has reviewed the Monitoring Well Abandonment Report dated August 25, 2017 for the referenced facility. The Division will require no further action at this time based on the information available, unless new information is discovered substantially changing the facts as we know them today.

If soils are excavated and removed from the UST site for use at another location, then the Division of Solid Waste Management must be contacted regarding the proper disposal and/or use of those soils.
